

# INTERDYN-PRODATA AND MICROSOFT KEEP YOU IN COMMAND OF YOUR SUPPLY CHAIN.

Utilizing state-of-the-art Microsoft Supply Chain products and services, InterDyn-ProData provides successful solutions to wholesalers, suppliers, manufacturers and fabricators. A 26-year-old firm, InterDyn-ProData offers complete local on-site consulting and software support. We:

- Deliver fully-integrated software solutions that enable distribution/manufacturing businesses to control costs, optimize product quality and maximize customer satisfaction—at the same time;
- Assist in achieving profit targets through meeting sales goals and corraling operations costs;
- Ensure automated, fast order processing that eliminates staffing up when business increases;
- Offer consulting services and software solutions to improve cash flow management and streamline adherence to government regulations;
- Integrate all customer data, order information, and office functions such as email and correspondence into one common platform supported by one vendor—along with a guarantee of future compatibility;
- Assist production and warehouse management in—
  - Forecasting future as well as actual anticipated production demands, required product ship dates and anticipated production capacities
  - Integrating manufacturing and inventory requirements
  - Minimizing overtime, product costs and excess inventory handling charges
  - Fulfilling sales demand
  - Tracking orders accurately and quickly—increasing customer satisfaction and loyalty.

## Our People:

- All gained valuable supply chain industry experience before joining the InterDyn-ProData team;
- Are trained and certified in Microsoft software products designed specially for distributors, manufacturers and fabricators;
- Address daily concerns voiced by production managers and VPs, warehouse managers, COOs, CFOs, CIOs, and IS managers.

*InterDyn-ProData: Strengthening supply chains since 1980.*

# Stock up on confidence with the industry's first right-time, right-priced enterprise recipe.

**Together, Decision Logic and Interdyn-ProData provide multi-unit foodservice operators seamless integration of Microsoft Dynamics GP corporate accounting with restaurant-level operations.**

We improve both processes and people, building confidence and consistency throughout your organization. Everything is examined—from Synchronized Budget Control functionality to comprehensive supply and payment integration (including restaurant-level online product ordering and Distribution Center e-invoicing).

You get a fully-integrated, seamless turn-key solution—using proven Microsoft tools and programs specifically designed for the needs of a multi-unit hospitality company. Decision Logic and InterDyn-ProData offer 36 years of combined experience in the Foodservice and Financial Accounting industries.

**Among your prime benefits:**

- Readily visible money and time savings. Buy only needed modules, get the industry's lowest upfront fees, implement quickly (Store training averages 90 minutes!)
- Better food service relationships, inventory tracking and order accuracy
- Happier, more efficient managers able to focus on product and improving service (instead of invoice reconciliation)
- Independent management of product and

- financial components of inventory
- Real-time bid file integration that assures consistent price compliance
- Financial accounting data that is captured and provided to both store and corporate level personnel
- Minimizes manual data entry and operational inefficiencies, reducing fixed and variable costs
- Resolves multiple brand/menu issues

**Components of this combined offering: Accounting, Payroll, Labor and Budget Control**

- Real-time sales, cash flow and other critical, decision-driving financial information on demand
- Automatic payroll/bank reconciliation information, updates
- Right-time P&L
- Automatic Payroll integration of store-level new hires and time worked
- Variance reporting
- Single new hire entry

**Sales and Financial**

- Daily sales reports
- Flexible ranking reports
- Drill-down functionality
- Complete Microsoft Integration

**Supply Chain and Variance**

- Online ordering
- DC e-invoicing
- Inventory position
- Product velocity
- Ingredient-level variance reporting
